

UPPER SANDUSKY'S RED HOT RECYCLE CONTAINER

Recycling service is provided to all residents eligible for City trash collection service.

By following the simple guidelines outlined here, you will be able to recycle without leaving home. The **RED** recycle bin provides clean, quick, convenient storage for all your recyclables between collections and keeps your recyclables from being contaminated by garbage and other waste. Recycling participants are required by City Council to use the **RED** bins. Please identify your **RED** bin by marking your address in permanent marker or using adhesive house numbers on the bin. To discourage scavenging and container theft, please do not set out your **RED** bin in the evening. If possible, set it out on the morning of your collection day before 7:00am.

NEWSPAPERS & MAGAZINES: Need to be bagged separately to protect from weather, and placed beside your Red bin.

GLASS JARS & BOTTLES: Must be separated from the other items and separated by color. Rinse clean, we collect clear, green, brown and blue glass. NO mirrors, ceramics, light bulbs, window glass or ovenware.

PLASTICS: Numbers 1 & 2. Soda Pop bottles, Detergent, Milk / Water Jugs, and Plastic bags. Rinse clean, may be flattened to save space.

ALUMINUM BEVERAGE CANS: Rinse clean, may be flattened to save space.

STEEL FOOD CANS: Rinse clean, may be flattened to save space. NO Aerosol cans.

OTHER RECYCLABLE ITEMS: Our trucks are not capable of recycling everything. Other items including cardboard, chipboard, books, and TV's may be eligible to be recycled by taking them to the: Wyandot County SWMD and Recycling Center, 11385 County Hwy 4, Carey, OH 43316. Telephone 419-396-3541. www.wyandotrecycles.com

Recycling is the most economical and environmentally safe method of waste management. Recycling reduces air, water and land pollution. Recycling saves valuable natural resources such as trees, water, minerals and fossil fuels. Recycling items are removed from the waste stream and made into new containers and products. Recycling needs your involvement to help solve the growing waste disposal problem.

“THANK YOU FOR RECYCLING”
